Agents will eventually be able to combine both their blue key FOB & their Supra LockBox keys into Blackberry devices.

According to gesecurity.com, "By the end of 2008, Supra eKEY software will be available for the BlackBerry Pearl, BlackBerry Curve, BlackBerry Pearl Flip, BlackBerry Storm, BlackBerry Bold and BlackBerry 8800 series smartphones. BlackBerry devotees will soon join thousands of real estate professionals already enjoying the timesaving benefits of eKEY service on their Palm and Windows."

Eventually, this gives real estate agents in the Regional MLS area (covering greater West Palm Beach, FL) more options when it comes to handling the blue key FOB and the Supra LockBox key.

It has yet to be determined if and when Regional MLS will allow this ability.
